

Capture all savings without the manual work

Uncover opportunities with AI-powered insights based on data you can trust.

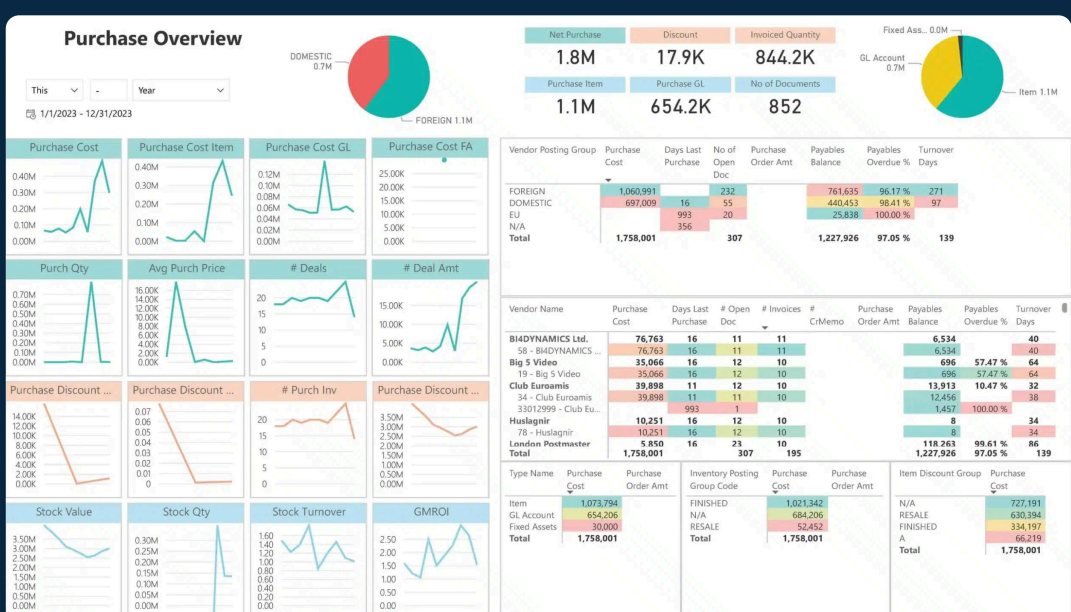

High-value opportunities at your fingertips

Discovering savings from traditional dashboards is like looking for a needle in a haystack. You don't know where to look, you're unsure what's hidden behind the data, and even if you spot something promising, it's unclear how to begin executing.

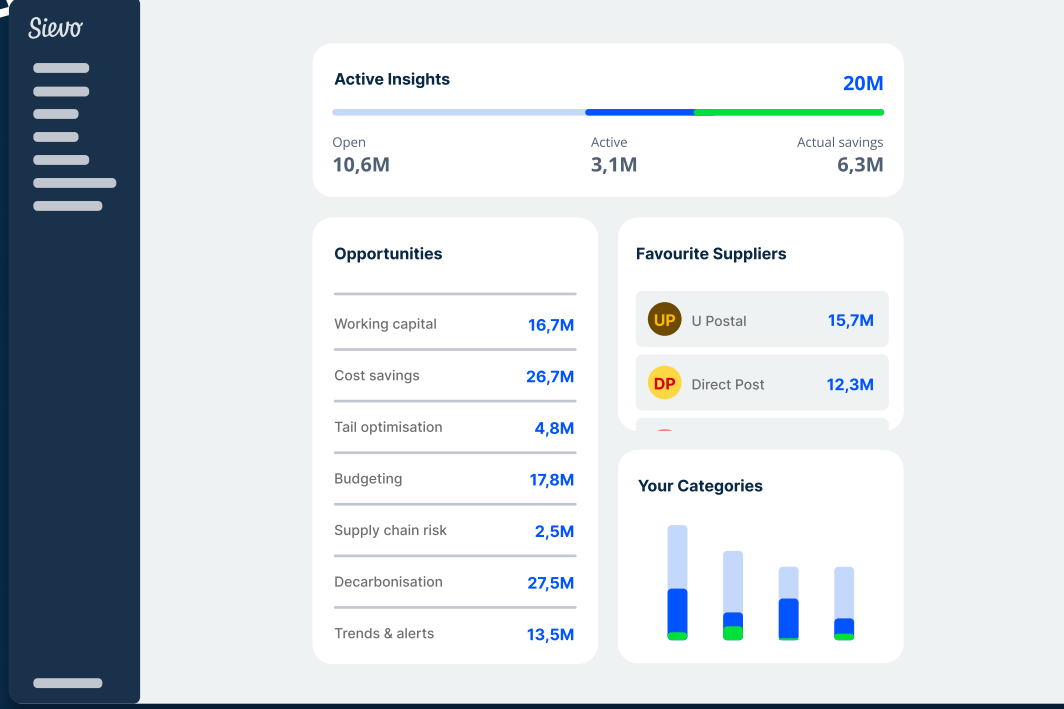

Sievo helps you spot savings opportunities instantly, with recommendations from your entire spend landscape and cross-customer Community Data. With quantifiable impact of each opportunity to help you prioritize next steps, Sievo guides you through the next steps you can take, even with a single click.

Looking for a single opportunity for hours...

with traditional dashboards.

Discovering relevant and personalized opportunities within minutes...

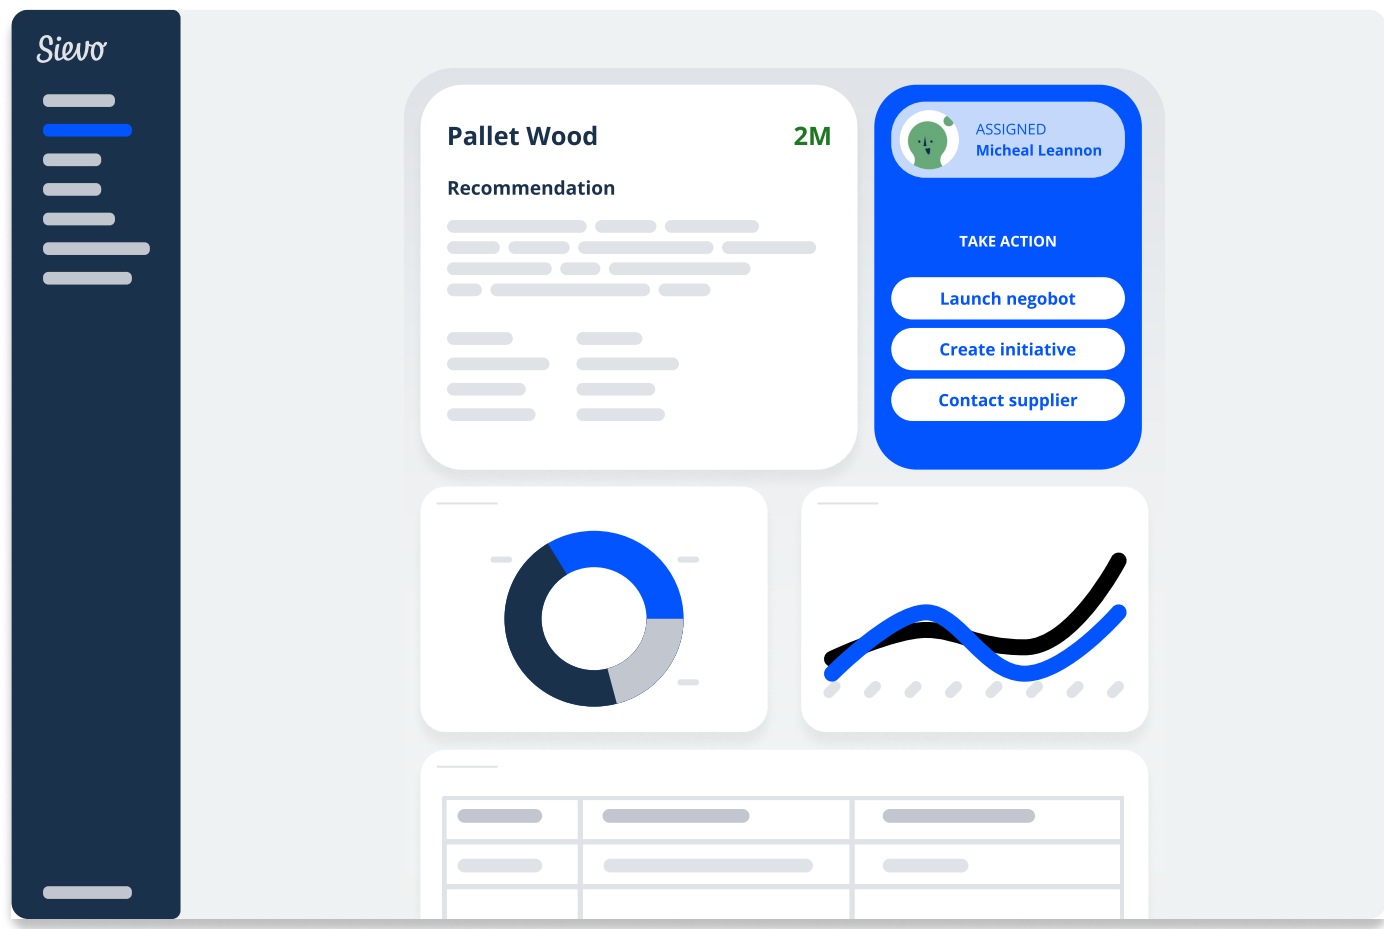

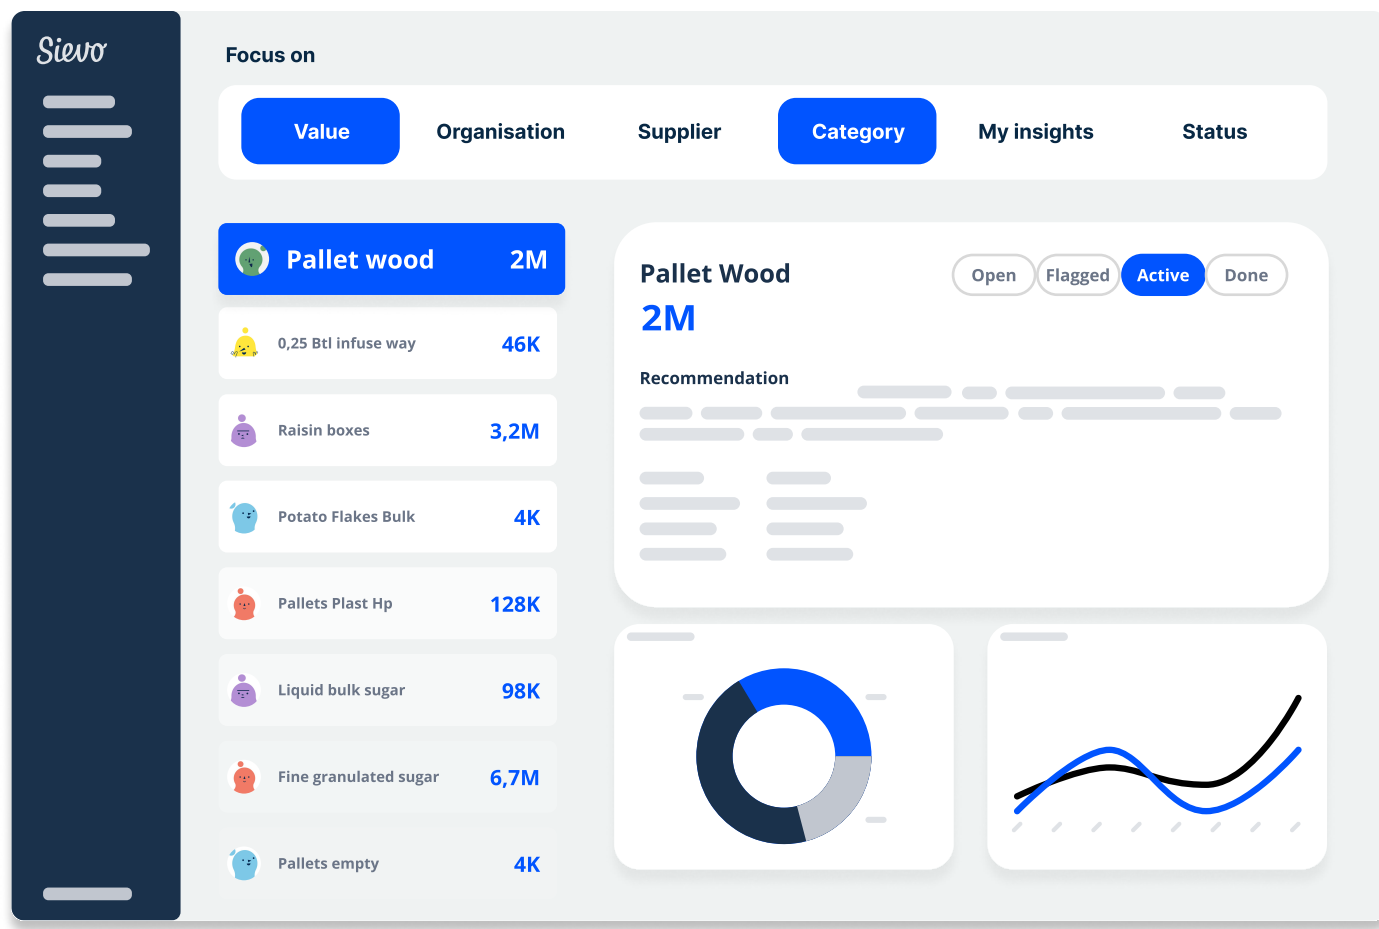

with Sievo!

Better decisions, faster and at scale

Get recommendations from high-value opportunities to previously unexplored avenues like tail spend, saving time previously consumed by manual analysis.

Timely opportunities, delivered instantly

Accelerate procurement decisions with AI-powered insights that **replace manual analysis**. From tail spend optimization and better negotiation outcomes to improved category strategies and sustainability, each insight is delivered with quantifiable outcomes, so you can **prioritize effectively** and maximize results.

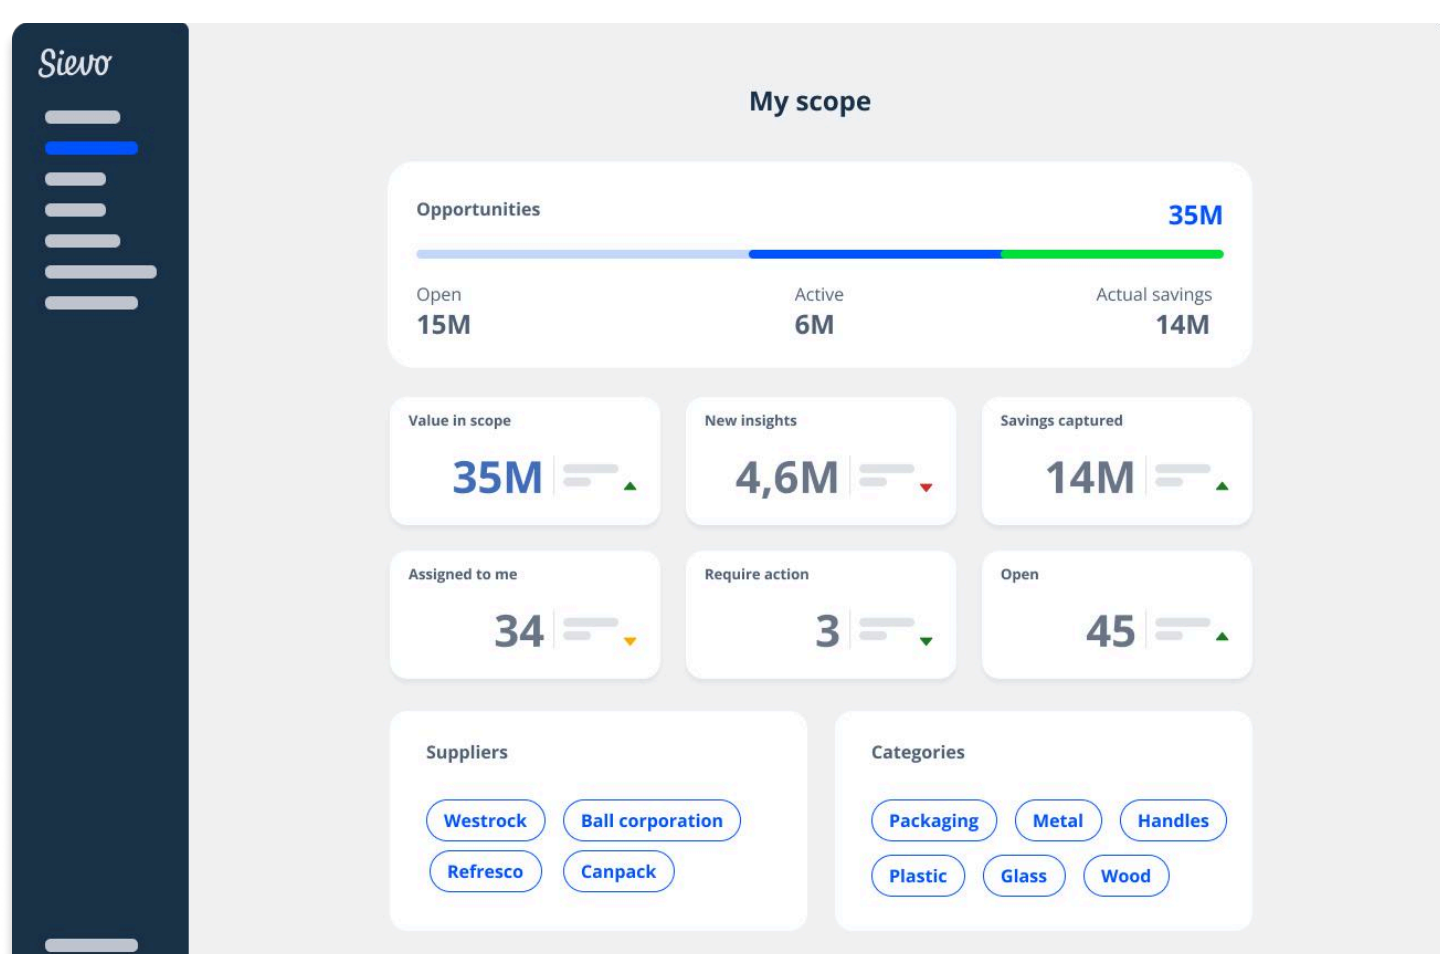

Fast execution with guided actions and automaton

Sievo not only delivers opportunities around the clock, but also empowers you to act on them instantly with **automated actions**, triggered with a single click. Progress opportunities into **streamlined initiatives**, generate **supplier emails** tailored to each insight, or initiate **autonomous negotiations**, all with guidance and minimal effort.

Relevant recommendations for every user

Cut through the noise with opportunities that are truly **relevant to you**, with a system that continuously **learns** and **improves relevancy** based on your actions. Assure **user adoption** and stay informed for timely action on the most recent and most relevant opportunities.

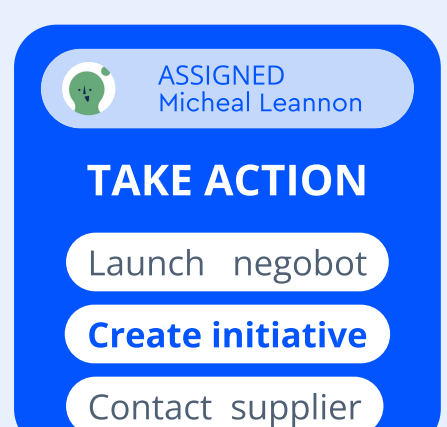

“ Sievo's insights help us monitor discrepancies and track progress more precisely. Assigning tasks to lead buyers and using the status bar makes it easier to report and gives clear visibility on our analysis.

“ Sievo gave us transparency to the data, Insights gives us ideas on what to actually do with the data. For example, we saw that one of our big suppliers has four different payment terms used in one country. Due to that we were able to align with our supplier and ensure that we are paying according to the frame agreement, instead of having all these different terms.

Close the data-to-action gap

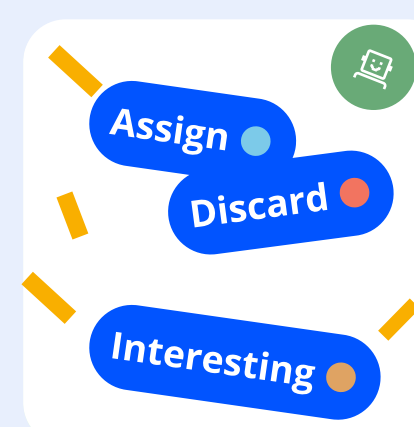

Create savings or decarbonization initiatives directly from an Insight

Take action by contacting suppliers with AI-generated emails based on an Insight

Initiate automated negotiations with a click of a button

Assign, discard or flag Insights for later review for improved experience with every iteration
