### Connect, scale and extend as you need to succeed

Verified by customers, Sievo is easy to integrate and scale into existing tech stack without burdening IT.

Gain a reliable single source of truth as Sievo connects seamlessly with your internal data sources

Enable access to third-party data enrichments your company needs now and in the future

Extend Sievo with your favorite tools to shorten the Source-to-Pay process

✓ 2700+ active integrations

✓ 1060+ data sources managed

✓ unlimited enrichments

✓ easy to scale

### Sievo integrates with any and many data sources

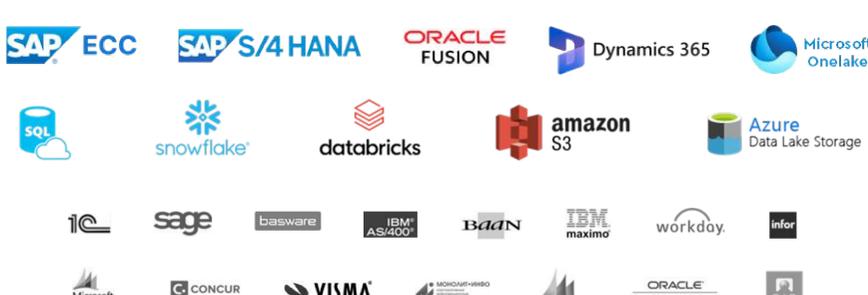

No data errors and no delays with automated extractions on weekly or monthly basis – no manual work for the customer. Easily scalable to hundreds of sources, now or when your data landscape changes. At Sievo, we tailor our approach based on your unique IT landscape. We have the necessary capabilities and expertise to provide fast, automated, reliable, and secure data extraction, no matter where your sources are:

#### On-premise

Sievo Data Extractor pulls data directly from the source system without altering them, ensuring data integrity and minimal impact on your system's performance.

#### Cloud

Sievo Connectors enables seamless access to diverse procurement data sources, supporting hybrid IT landscapes and future-proofing data integration strategies.

✓ no data errors, no delays

✓ Weekly/monthly refreshes

✓ No manual work for you

Don't see yours?

Having integrated with 1060+ different data sources, we are positive we know it.

### Fuel your data with Sievo Community Data the largest community database in procurement analytics

Leverage Sievo's proprietary insights and benchmarks derived from across Sievo's customer base that companies cannot obtain on their own.

**2%+ Global GDP**

across categories

#### Supplier Payment Terms Recommendations & Benchmarks

#### Category & Material Price Indexes

#### Supplier Discovery

### Build a sustainable and resilient supply chain with unlimited third-party data enrichments

Sievo ensures frequent refreshes for up-to-date decision-making.

Can't find your provider on the list? No worries, we can make it happen.

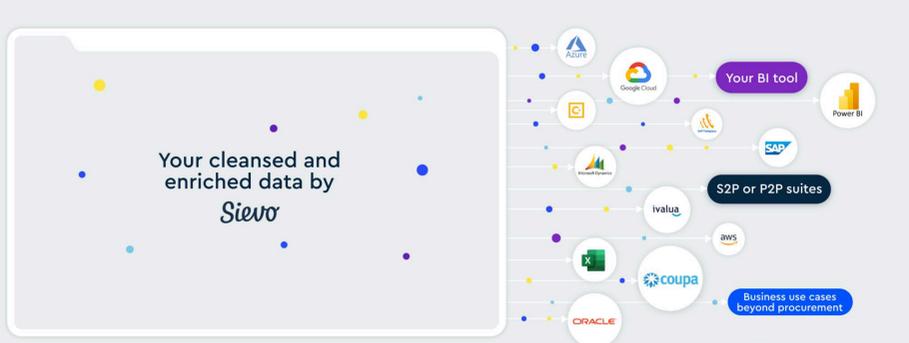

### Get cleansed and enriched data back to your systems with Sievo Data Share

Sievo delivers high-quality cleansed and enriched data, regardless of your data quality, complexity or location. Through Sievo Data Share, we can return the extracted, cleansed and enriched data back to you. By extending the use cases beyond procurement analytics, you can empower your whole business to make reliable data-driven decisions with Sievo's high-quality data. For example:

**Boost your Business Intelligence** enable your whole company to report more accurately with Sievo's data

**Improve your Source-to-Pay suite** with Sievo's data for contracting or supplier management

**Align internal departments** with procurement by using Sievo's data e.g. in CRM or Sustainability tools

### Shorten your Source-to-Pay process with your favorite tools

Empower your company to capture savings faster by extending Sievo with automation and sourcing tools that simplify, streamline, and shorten your Source-to-Pay processes.

Close the data-to-action gap by capturing a Sievo identified savings opportunity through AI-driven negotiation.

Capture Sievo's identified opportunities immediately through Keelvar's autonomous tools for sourcing events and supplier negotiations.

Streamline your sourcing process by connecting Sievo to Archlet's advanced sourcing analytics and scenario optimization.

Simplify eSourcing by extending Sievo's findings with Marketdojo's tools to run tenders, RFQs, and auctions.

Realize Sievo's identified opportunities through Scanmarket's eSourcing suite with contract and supplier management tools.

Complement Sievo with Basware's procurement and invoicing platform to automate and streamline the entire source-to-pay process.

Can't find your favorite tool on the list? No worries, we can make it happen.

### Your data security is our priority
