

Orchestrate procurement decisions with AI speed & human understanding

Replace manual data analysis with conversational analytics. Let AI execute for you, so you can focus on making faster, smarter procurement decisions – at scale.

AI is only as good as the data it is trained on
Sievo AI is trained on 2%+ of global GDP annually

Tailored for Procurement

Unlike generic AI chatbots or copilots, Sievo IQ offers actionable answers that are relevant to procurement professionals.

Beyond time saving

It's not just about time. It's about the cost of not taking immediate action to valuable opportunities.

Autonomous problem-solving

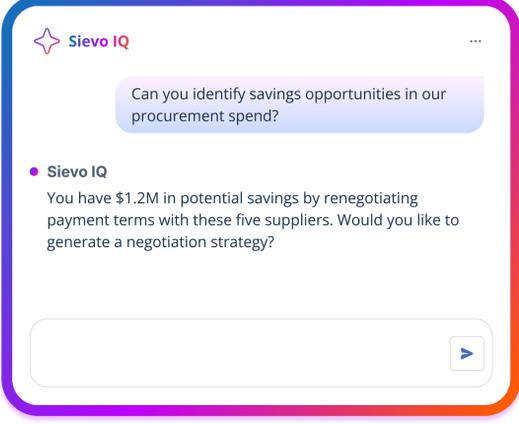

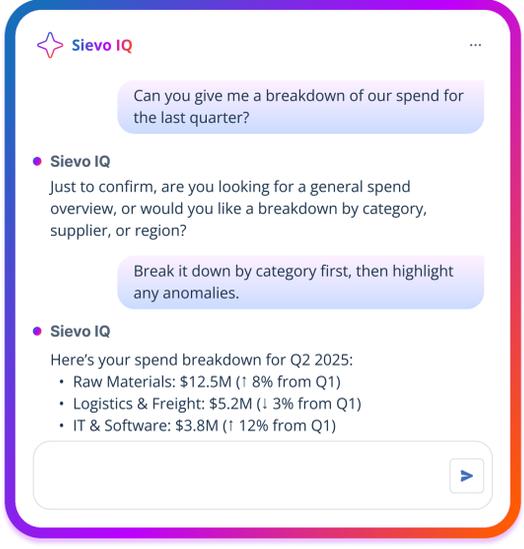

Functions like your own personal team of expert assistants working to uncover analytics that deliver tangible results.

Actionable analytics tailored to your requirements

Sievo IQ is not "another" AI chat bot or tool; it's a complete paradigm shift in how you interact with your procurement data. Regardless of your role or area of expertise – whether making strategic decisions or seeking fast data interpretations – you will get actionable results.

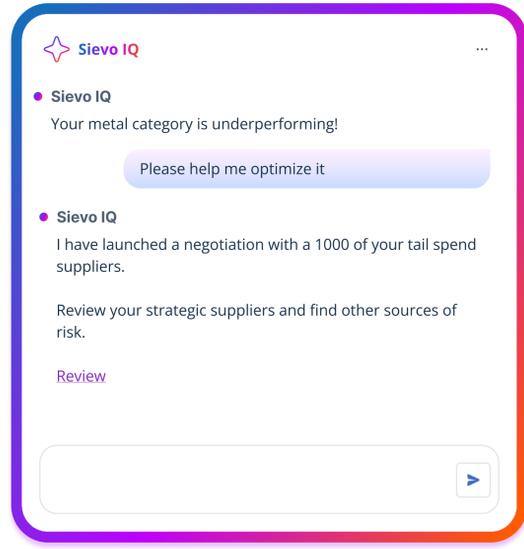

Simplify complex analytics

Sievo IQ has the ability to precisely interpret questions like a human assistant to **deliver relevant and accurate responses**, with the speed and efficiency of an AI. Sievo IQ generates **answers based on your unique procurement datasets**. Designed for **continuous learning**, it evolves with your input, ensuring alignment with your business objectives. By **automating tedious analytics**, Sievo IQ frees up time for strategic decision-making and enhances efficiency.

Precise and context-driven responses for timely insights

Sievo IQ empowers you to interact with your procurement data conversationally, enabling true "ask me anything" usability. Unlike traditional assistants and self-service tools, it delivers **precise, contextualized answers** through **advanced reasoning**.

Coming soon

Built in Agentic AI functions that take efficiency to an entirely new level

Sievo IQ doesn't just respond to your questions – it **proactively surfaces valuable, timely procurement intelligence** you might otherwise miss. By unlocking the full potential of your procurement data, Sievo IQ goes beyond analysis: it uncovers cost-saving opportunities, evaluates supplier performance, pinpoints CO₂ emissions hotspots, and can even **take action** or **guide you through the next steps** to capture those opportunities.

Instant action. No dashboards. No manual work.

Intent Recognition

Trained on 2% of global GDP, Sievo IQ accurately detects the area of your procurement data the question pertains to, be it spend analysis, ESG, or other.

1

Data Mapping

Sievo IQ understands your data's labels and structures, ensuring it pulls accurate and contextualized information.

2

Response Generation

It crafts a clear and helpful answer tailored to procurement and in context to your query, while learning and adapting with every interaction.

3

Decision Orchestration

Sievo IQ not only guides you through the next steps to capture the opportunities, but also automates actions where possible.

4

Powered by industry's leading data quality
